INTRODUCING... THE BATTLETOADS

BATTLETOADS - BLAST THROUGH THE SCREEN!

Three young, All American video-game testers are transformed into three young, All Amphibian video-game heroes when play testing a brand new video-game for the PSICONE CORPORATION.

The name of the game is BATTLETOADS, and it has a secret hidden in the heart of its silicon chip - a mysterious virus which acts, not only upon the game's program, but on the players themselves, transforming them into video game characters and thrusting them through the screen into the pixel-populated dimension beyond. A dimension known as the Gamescape.

The Gamescape is a world where anything can happen - where the timeless battle of good versus evil is fought with a unique blend of powerful sorcery and high technology. It is a world that has always existed, but which can only now be visited via the portal of computer data. Programmers hold the key to this portal - a key not of metal but of mathematics - giving us access to the virtual reality beyond the screen. This is a world of weirdness and wonder, of gigantic games played against a backdrop of galaxies, a world of mystery and magic, frights and fantasy...

New worlds demand new and original heroes. Adventurers and explorers must chart the territory from which its legends and myths are woven. Such heroes are the BATTLETOADS, a unique mixture of man, amphibian and computer technology.

Blast through the screen!

BATTLETOADS - NEW HEROES FOR A NEW AGE...

Name: Zitz

Age: Unknown

Height: 6'8"

Weight: 303 lbs

Hair: None

Eyes: Amphibian

Outstanding features: Green and warty skin. He wears a wrist computer, utility belt, gloves and studded knee pads.

History: The brainiest BATTLETOAD began life as MORGAN ZIEGLER, a twenty year old Games Tester for the multi-national PSICONE CORPORATION.

Due to a virus in the prototype 'mind game' BATTLETOADS which ZIEGLER was testing, he was transformed into a humongous 3D computer graphic called ZITZ.

Profile: ZITZ is a natural leader, relying on brains rather than brawn to save himself and his buddies from life threatening situations. Sometimes however, he relies a little too much on brain power and not enough on spontaneous physical action. Fortunately, this falling is more than made up for by the other two members of the BATTLETOADS team.

Name: Rash

Age: "Not too young to boogie,
not too old to rock n' roll!"

Height: 6'3"

Weight: 243 lbs

Hair: None

Eyes: Amphibian

Outstanding features: Mega-physique (he says). He wears sunglasses, Ninja-style ribbons and studded knee pads.

History: The most beautiful BATTLETOAD (he says) began life as DAVE SHAR, a seventeen year old Games Tester for the multi-

national PSICONE CORPORATION. SHAR also fell victim to the rampant virus in the prototype 'mind game' BATTLETOADS which he was testing. As a result he was transformed into the humongous 3D computer graphic called RASH.

Profile: RASH is perhaps the most likeable of all the 'loads' and the most annoying too. His over confidence grates on the nerves at times. Due to the obsession of his alter-ego (Dave Shar) with pumping iron, RASH has an inbuilt early warning system that takes the form of a body builder's physique display and this arises whenever the group are threatened.

Name: Pimple Age: Unknown Height: 7'4"

Weight: 520 lbs Hair: None Eyes: Amphibian

Outstanding features: Absolutely humongous. He wears studded wristbands and knee pads.

History: The biggest BATTLETOAD began life as GEORGE PIE, a nineteen year old Games Tester for the multi-national PSICONE CORPORATION.

PIE was another victim of the virus in the prototype 'mind game' BATTLETOADS which he was also testing. In an instant he was

transformed into the humongous 3D computer graphic called PIMPLE.

Profile: Although he is not exactly the smartest BATTLETOAD, PIMPLE more than makes up for his lack of brain power with his phenomenal physical strength.

Whenever Herculean feats are required, PIMPLE is the guy to call. He's a gentle giant most of the time, but watch out if you should happen to hurt any of his friends - then he's liable to turn real mean.

The BATTLETOADS mentor is the immortal PROFESSOR T. BIRD, affectionately known as the 'roach'. His harmless bumbling exterior conceals an enormous intelligence and a stupendous magical talent. However, he has renounced their use, preferring science and logical thought - as does his protégé ZITZ - to get him out of trouble.

"Professor T. Bird"

The Professor's nemesis is the immortal Dark Queen. She has an unquenchable thirst for power and is a highly dangerous megalomaniacal psychopath. She uses her magical talents and her dark and terrible beauty to her advantage. Many a man has fallen foul of their combined effects. Her 'life quest' (as she calls her vicious lust for power) is to claim what she has deluded herself into believing is her rightful place on the Terran Corporate throne. She will stop at nothing to achieve this end and has destroyed entire solar systems - millions of lives - in her relentless drive for galactic, and ultimately universal domination.

"The Dark Queen"

THE DARK QUEEN'S FOUL PLAN

After her defeat by the Galactic Corporation at the battle of Canis Major, the Dark Queen and her renegade space troops retreat to the outer reaches of the universe, hiding out in the dark spaces between the stars.

Meanwhile, on board the spaceship Vulture, Professor T. Bird and the Battletoads - Rash, Zitz and Pimple - are escorting the Princess Angelica back to her home planet where her father, the Terran Emperor, awaits her safe arrival.

Along the way, Pimple, (the biggest Battletoad), takes Princess Angelica out for a cruise in the Toadster to a nearby Leisure Station.

Pimple and Princess Angelica burn space, but the Dark Queen ambushes them before they can get there. Luckily, Pimple manages to send out a distress signal before the Toadster is gobbled up and carried away to Ragnarok's World, the Dark Queen's planet...

So, there's the situation 'toad. The Dark Queen has kidnapped the Princess Angelica and your best buddy Pimple - so what're ya gonna do about it?!

You're gonna get real MAD, that's what you're gonna do, and then you're gonna get EVEN! Professor Bird's gonna set you down on Ragnarok, but from there it's up to you. You've got a long way to go 'toad', through ice and fire and nightmares so terrible you don't even want to imagine 'em - through a monstrous Gargantuan and ultimately to the Tower of Shadows, where the Dark Queen awaits you.

Have you got the guts 'toad? We'll soon see, one way or another...

GAME CONTROLS

To play Battletoads you'll need a control pad connected to port 1 of your CD32. If you wish to play a 2-player game you'll need a second control pad connected to port 2.

Once the game has loaded, you will be presented with the title screen. To skip the intro and see the options screen, hit the red button.

Select the number of players (1 or 2) by pressing the yellow button. Choose between music or sound effects by pressing the blue button.

Once you're happy with the options, hit the fire button to begin your mission!

The control pad moves you around the screen and gives you the following capabilities:

- To run faster, give the direction control two pushes in rapid succession in the direction you wish to run.
- To carry out the Battletoad Butt, press fire whilst running fast.
- While moving, hit the Fire button to jump.
- To attack, hit the Fire button!
- To pick up an item, stand over it and hit the fire button.
- To eat the flies (!) stand still and hit the Fire button when one flies past!

HOW TO PLAY

(A) Player 1 score

The current score for player 1 is shown here.

(B) Lives

The number of lives remaining is shown here. Each heart represents one life.

(C) Energy

This shows how much energy you have left. It will reduce from right to left. When all of the boxes are empty then you will lose a life. Each new life replenishes the energy back to full strength.

(D) Game screen

This is where the action takes place! The game will begin when the spaceship Vulture lowers the Battletoads down to Ragnarok's World. Your toadally awesome rescue mission has begun, so hit the ground running.

Awaiting your arrival are endless canyons, dark holes, a terrifying tunnel, an arctic cavern, a scalding inferno and much more! Each one is filled with monstrous baddies and dangerous obstacles.

The baddies take the form of the Dark Queen's army of menacing villains, and they're gonna try and stop you from reaching the Tower of Shadows where she holds Pimple and the Princess Angelica captive.

Obstacles are the deadly weapons which the Dark Queen has carefully hidden to catch you completely off guard. Advancing to the next level requires defeating all of the baddies in the current level and avoiding all of the obstacles.

You'll have to be careful, because they like to hit back, and if you're hit too many times you're as good as gone because each Battletoad has a limited life span. Luckily, you have a series of mega-powerful punches, slams and kicks at your disposal which only a Battletoad can activate. Also, certain objects may be picked up along the way and used as weapons. For a little extra energy, try munching on some nice juicy flies.

Once you finally reach the Tower of Shadows, the ultimate showdown begins. Here the Dark Queen will use every means possible to keep you from getting your hands on Pimple and the Princess Angelica. The surprises she has in store are enough to make your green skin crawl!

THE BADDIES

Dark Queen - She commands her evil forces from the Tower of Shadows. You must seize her power to save your friends.

Dragon - Will swoop down on you when you least expect it. Watch out for its speciality, the 'toad-slam'.

Saturn Toadtraps - Feed exclusively on 'toads, but you can uproot them with the IFT Bashing Ball.

Rat Rockets - With built-in power boosters, this rodent is bent on either mowing you down or showering your green head with obstacles.

Giblet - A robust rodent who is surprisingly quick and mean. Beat him to the bomb, or your history.

Scurz - These cowardly characters attack in groups from behind, but the Battletoad Butt will send them on their scuzzy way.

Ravens - Tough old birds, (no relation to the professor) who can't wait to get their claws on you. A mutant variety will try to snip your turbo-cable with its big beak.

Vaders - This survivor of the original invaders is out to steal your energy bars and escape with them.

Walker - The type that kicks you when you're down. Bust 'em up then use a leg as a weapon.

Boss Walker - Stay out of sight or this witless Walker will cook your green butt and send it leaping.

Psyko-Pigs - Wielding battle axes, these swine will give you a major headache unless you make pork chops out of them first.

Sentry Drones - The experts at 'toad-termination. Let 'em kiss your list.

Robo-Mamus - A genetically enhanced biogen, mutated by the forces of darkness. Consider him armed and dangerous or he'll send your 'toad-hide soaring with one burst from his blasters.

Electra-Eel - Let this sea serpent slither nearby and you'll get a buzz you won't soon forget.

Snowman - Frosty's evil snow slingin' twin. Dodge his snowballs then melt him with your Nuclear-Knuckles.

Hammerfish - Don't be fooled by this innocent looking little fish. It'll nail you the first chance it gets.

Hornhead - Voted ugliest in his class, this oaf patrols the Tower. Don't let him make 'toad-kebab out of you.

Steel-Beak - A duck which no 'toad would want in its bath. Watch out for its beak. It packs one heck of a peck!

General Slaughter - One of the Dark Queen's least intelligent commanders. He always uses his head, if only as a weapon.

Other baddies you will encounter include:

Techno-Droids - These unruly robots patrol the entrances to the Terra Tubes. Give 'em the Battleoad Butt and watch them fly.

Krazy Kog - You'd best avoid this mechanoid menace or you'll end up a 'toad pancake.

THE OBSTACLES

Gasser - A puff of truly smelly gas that is sure to leave you breathless.

Sucka - Like a fancy food processor, it drags you into its spinning blades and turns you into ground 'toad-meat.

Big Ball - Once it gets on a roll, it can knock you right on your 'toad-butt. Get ready for a vigorous game of dodge ball.

Spike Ball - Revolving around the dreaded Tower of Shadows, this orb has been known to really stick it to intruders.

Snothall - You'll need more than a tissue to clean up this goo since it clings to the roof and floor, waiting to slime you.

Snowballs - A blizzard that's guaranteed to send a cold shiver down your 'toad-spine.

Ice Spikes - Unless you're fast on your green feet, these falling frozen daggers make you feel like a pin cushion.

Retro-Blasters - These smash out of walls and fire lethal bolts of energy. Short circuit them by using the BT Bashing Ball.

Electro-Zap - With 2,000 volts of 'toad-frying electricity between them, they glide across the screen at shocking speed.

Swellcheeks - A rather windy individual guarding the Tower. Hang on or you'll become a sky diving 'toad.

Other obstacles you will encounter include:

Spikeback - Stumble onto their spike covered armour and you'll surely get the point.

Meteorites - A storm of fiery rocks headed your way. Get that Jet Turb'n moving!

Missiles - An explosive barrage that comes at you from all sides. Avoid them, or your 'toadst!

Buzzball - The only way to shake loose of this humongous ball of killer static cling is to oul leap it to the finish.

Electro-Gaps - These electrifying little gaps between platforms can be a real shocker.

SMASH HITS

To access these monstrous manoeuvres, press FIRE!

Turb'n Thwack - Swingin' Size Thirteen's - Jawbuster - Kiss-My-Fist - Battletoad Butt - BT Bashing Ball - Nuclear Knuckles - Big Bad Boot -

SPIELREGELN

(A) Punktzahl Spieler 1

Hier wird die Punktzahl des ersten Spielers angezeigt.

(B) Leben

Hier wird die Anzahl der verbleibenden Leben angezeigt. Jedes Herz stellt ein Leben dar.

(C) Energie

Hier wird die übrige Energie angezeigt. Sie nimmt von rechts nach links ab. Wenn alle Felder leer sind, verlierst Du ein Leben. Jedes neue Leben füllt die Energieebene wieder voll auf.

(D) Spielbildschirm

Hier geht das Spiel ab! Das Spiel beginnt, wenn das Raumschiff Vulture die Battletoads auf Ragnorak absetzt. Die aufregende Rettungsmission beginnt jetzt, also halte dich bereit.

Bei der Ankunft erwarten dich endlose Täler, ein schrecklicher Tunnel, eine arktische Höhle, ein siedendes Inferno und weitere Abenteuer! Jede Szene ist voll von monströsen Übeltätern und gefährlichen Hindernissen.

Die Bösen konzentrieren sich als Armeen der Dark Queen, und sie versuchen zu verhindern, daß Du den Turm der Schatten erreichst, in dem Pimple und Prinzessin Angellia gelangen sind. Als Hindernisse begegnen Dir hier die todbringenden Waffen, die von der Dark Queen sorgfältig versteckt wurden, um dich damit zu gefährden. Um zur nächsten Ebene zu gelangen, mußt Du alle Übeltäter auf der jetzigen Ebene schlagen und alle Hindernisse umgehen.

Du mußt sehr vorsichtig sein, denn sie schlagen zurück, und wenn Du zu viele Schläge einsteckst, bist Du so gut wie weg vom Fenster, denn jeder Battletoad hat nur eine begrenzte Lebenszeit. Glücklicherweise stehen Dir eine Reihe von megastarken Schlägen, Stößen und Tritten zur Verfügung, die nur der Battletoad einsetzen kann. Es können auch am Weg liegende Gegenstände aufgenommen und als Waffen verwendet werden. Wenn Du etwas zusätzliche Energie benötigst, dann kaue einfach ein paar saftige Fliegen.

Wenn Du den Turm der Schatten erreicht hast, beginnt die Entscheidung. Die Dark Queen benutzt jedes Mittel, damit Du nicht zu Pimple und Prinzessin Angellia gelangst. Die Mittel, die ihr zur Verfügung stehen, lassen deine Krötenhaut zur Gänsehaut werden!

Istruzioni di caricamento

Inserire il CD Battletoads nel CD32 come descritto nel manuale di istruzioni Commodore e accendere il computer. Dopo alcuni secondi apparirà il gioco.

- Per continuare il "Battletoad Butt", premere il pulsante del fuoco mentre il personaggio corre molto velocemente.
- Mentre ci si sposta, premere il pulsante del fuoco per saltare.

Esecuzione del gioco

(A) Punteggio del giocatore 1

Qui appare il punteggio corrente del giocatore 1.

(B) Vite

Qui viene mostrato il numero di vite rimanenti. Ogni cuore rappresenta una vita.

(C) Energia

Mostra quanta energia vi rimane. Si riduce da destra a sinistra. Quando tutte le caselle sono vuote perderete una vita. Ogni nuova vita riporta il massimo di energia.

(D) Schermo del gioco

L'azione si svolge qui! Il gioco inizia quando la navicella spaziale Vulture scarica i Battletoads nel mondo di Ragnarok. La vostra straordinaria missione di salvataggio è iniziata, quindi toccate terra correndo.

Ad accogliervi vi sono i canyon infiniti, i buchi neri, un tunnel terrificante, una caverna artica, un inferno rovente e molto di più! Ognuno di essi è pieno di nemici mostruosi e ostacoli pericolosi.

I cattivi prendono la forma dell'esercito di malviventi della Dark Queen e cercheranno di impedirvi di raggiungere la Torre delle tenebre in cui sono prigionieri Pimple e la principessa Angelica.

Gli ostacoli sono armi letali che la Dark Queen ha nascosto con attenzione per cogliervi impreparati. L'avanzamento al livello successivo richiede la sconfitta di tutti i cattivi nel livello corrente e il superamento di tutti gli ostacoli.

Dovrete fare attenzione, perché a loro piace contrattaccare e se venite colpiti troppe volte sarete praticamente eliminati perché ogni Battletoad ha una vita limitata. Fortunatamente, avete una serie di pugni megapotenti, colpi e calci a disposizione che solo un Battletoad può attivare. Inoltre, alcuni oggetti possono essere raccolti nel percorso e usati come armi. Per un po' di energia supplementare, provate a sgranocchiare qualche mosca sucrosa.

Una volta raggiunta la Torre delle tenebre, inizia la prova finale. Qui la Dark Queen userà ogni mezzo possibile per impedirvi di mettere le mani su Pimple e sulla principessa Angelica. Le sorprese che ha in serbo vi faranno acciappare la vostra pelle verde!
